

# Dell Boomi for Onboarding

Unify onboarding experiences across your connected business for employees and customers

Disconnected onboarding processes are expensive for your organization. New hire onboarding delays can impact productivity and hurt employee engagement, while delays in customer onboarding can significantly limit revenue growth. With structured onboarding, companies can boost employee productivity and achieve their business outcomes faster.

## Streamlining Your Processes with the Onboarding Solution Accelerator

Onboarding Solution Accelerator makes it possible to quickly add new employees and customers into your organization and effectively support them from Day 1. Onboarding Solution Accelerator includes prebuilt dashboards, workflows, connectivity and data models that you can leverage to automate end-to-end Onboarding. The package also includes implementation services that consist of “JumpStart” training, architecture review, and project management support.

### Onboarding Solution Accelerator allows you to:

- Bring together processes and workflows from across your organization
- Connect both on-premise and cloud applications residing in your hybrid IT environment
- Create an automatically maintained data repository that provides a “single version of truth” for your employees and customers

Combined, these capabilities bring together your onboarding experience for customers and employees into a unified, seamless process.

### Reduce Manual Effort

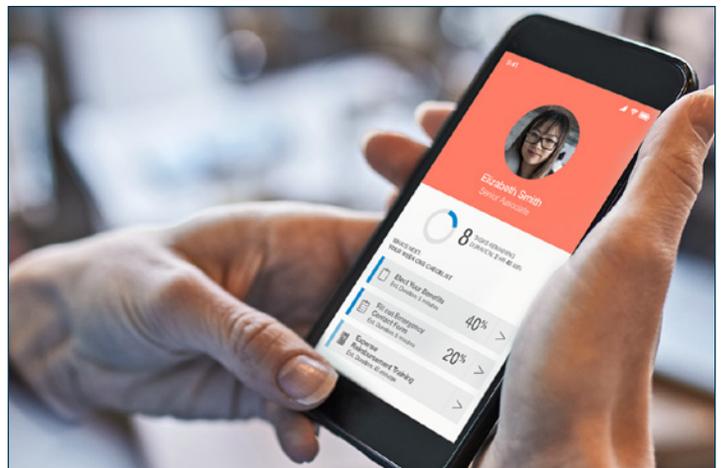

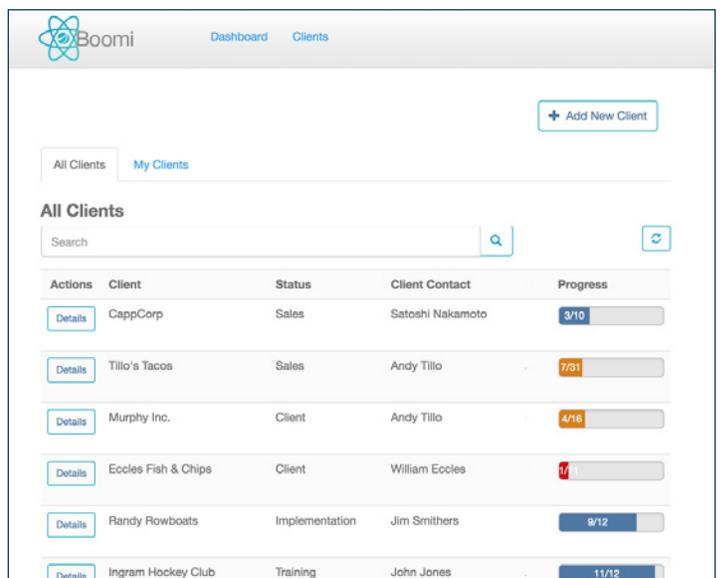

- Transform your entire onboarding process to a seamless, automated and paperless process.
- Minimize manual data entry and greatly reduce human error
- Automate management of compliance notification and escalation workflows

### Streamline Collaboration

- Support efficient, consistent and flexible experiences for your onboarding team
- Automate real-time visibility into onboarding workflows to reduce turnaround time

### Improve engagement

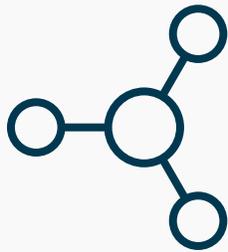

- Create a unique and reliable onboarding experience that is responsive and agile
- Reduce attrition due to poor onboarding experiences
- Decrease acquisition costs for employees and partners

Actions	Client	Status	Client Contact	Progress
<a href="#">Details</a>	CappCorp	Sales	Satoshi Nakamoto	3/10
<a href="#">Details</a>	Tillo's Tacos	Sales	Andy Tillo	7/31
<a href="#">Details</a>	Murphy Inc.	Client	Andy Tillo	4/16
<a href="#">Details</a>	Eccles Fish & Chips	Client	William Eccles	1/1

# Bring Together the Rich Capabilities of Boomi's Unified Platform to Simplify Onboarding

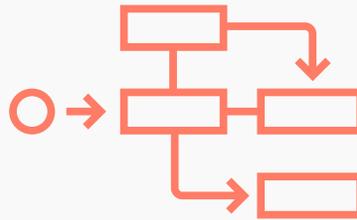

## Connectors

Easily integrate workflows with popular cloud applications, or use the Boomi connector for advanced integration requirements and when processes need to integrate with on-premise systems.

## Prebuilt Integration Processes

Boomi Process Libraries provide all users with prebuilt starter processes for common applications and use cases. Users can deploy a process as is or modify it to suit specific requirements.

## Multi-User Workflow

Create workflows that orchestrate interactions from one individual or team to another. Build simple approval processes or complex cross-organizational workstreams.

## Full API Access

The entire workflow automation platform is API-based, giving you enormous control to create lowcode applications that meets your exact needs.

## Data Stewardship

Manage data for consistency and accuracy with powerful tools to validate, cleanse and merge quarantined records.

## Real-Time, Bi-Directional Data Flow

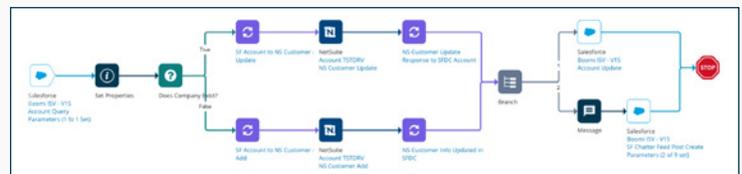

Focus on data enrichment — not just validation — through real-time, bi-directional synchronization of data to your cloud and on-premise applications.

*“When you can enter data once and have it connect everywhere, that is a tremendous advantage.”*

Ander Tallett  
Associate Director of Business Systems,
