

Dell Boomi for Workday

Quickly and easily connect Workday with internal and partner systems

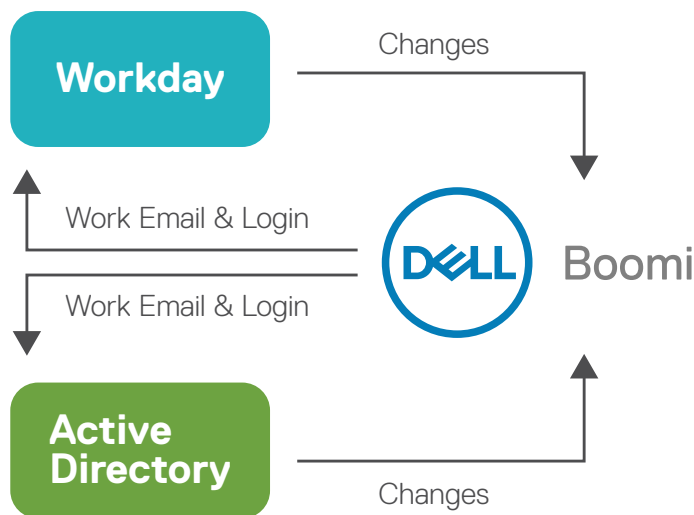

Dell Boomi delivers fast, easy application and data integration for Workday customers to automate key processes for human resources. Connect your Workday human capital management (HCM) system with internal and third-party applications to improve administrative efficiency, increase productivity and raise employee satisfaction.

Modernize HR with cloud-native integration

Smart enterprises are modernizing HR systems to improve business performance and make the most of a changing workforce amid digital transformation. That depends on integration — but organizations can't afford the time and cost of custom-coding or traditional on-premise integration middleware.

Boomi's cloud-native integration platform as a service (iPaaS) lets Workday customers quickly and flexibly connect with any cloud or on-premise system. Integrate Workday HCM with external payroll and benefits service providers, or with internal ERP, learning management, recruitment, or identity management applications such as Microsoft Active Directory.

Agile integration and workflow automation from Boomi give your HR organization the flexibility to stay ahead of business needs while ensuring you have a unified, trusted record of critical employee data.

Quickly and easily connect Workday with Microsoft Active Directory using the Boomi low-code integration platform.

Streamline key processes. Eliminate time-consuming and error-prone data updates for recruitment, onboarding, employee changes, and benefits enrollment. Boomi equips you to build a workflow-driven HR ecosystem that provides exceptional efficiency and visibility into essential employee data.

Improve employee satisfaction. Meet the expectations of the tech-savvy millennial workforce for a seamless consumer-grade experience in onboarding, compensation and benefits. Boomi lets you provide personnel with on-demand data access to help improve employee satisfaction and retention, minimizing costly turnover.

Create a unified system of record. Ensure that employee data is consistent and accurate across all applications. Boomi Master Data Management (MDM) generates and governs a core record of employee data that can update other applications, minimizing the risk of inaccurate or redundant employee information.

Enrich HR analytics. Connect vital data to measure personnel performance, refine HR budgeting, and identify areas for improvement. For example, Boomi provides flexibility to easily assess the effectiveness of training programs by merging data from learning management and ERP systems.

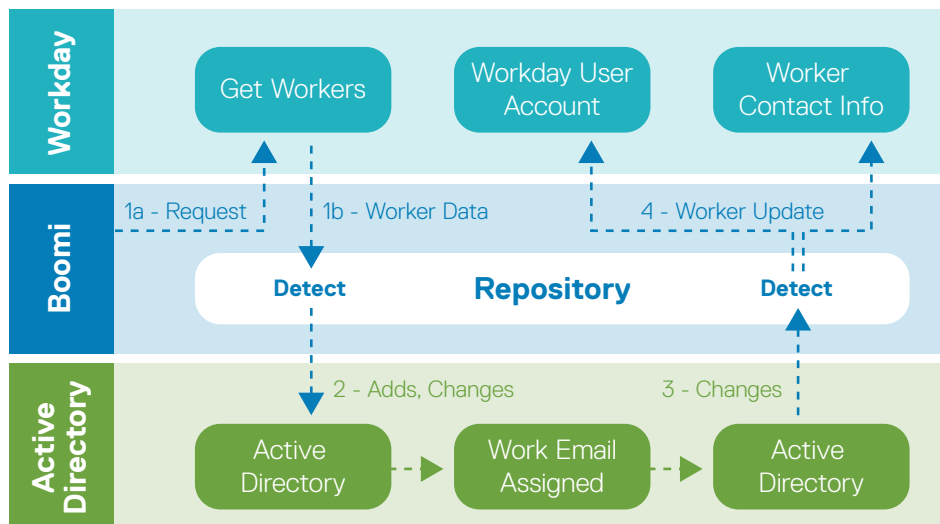

Automate Common Workday HR Integration Use Cases

- Payroll
- Benefits
- Recruitment and screening
- Onboarding and job changes
- Identity management provisioning
- Time and attendance

The Boomi Integration Accelerator for Workday and Microsoft Active Directory

Streamline employee data synchronization with sophisticated pre-built connectivity

The Boomi Integration Accelerator for Workday and Active Directory eliminates the manual effort of setting up and running data synchronizations. With more than 90 percent of integrations pre-built between the two systems, the Boomi Accelerator provides turnkey help to get you up and running quickly. It offers bi-directional data connections that streamline onboarding, employee changes and termination.

Gain future-proof flexibility for HR integration

Developed in partnership with Workday, the Integration Accelerator for Workday and Active Directory is prepackaged for the on-premise Active Directory. And Boomi's inherent flexibility also makes it easy to adapt your integration processes for the cloud-based Azure Active Directory.

Rapidly build, deploy and manage integrations

Boomi makes it fast and easy to connect Workday and Active Directory. Log in to the two systems, access Boomi's pre-built integrations and deploy a Boomi Atom run-time engine on a local server. The Integration Accelerator lets you:

- Enhance data timeliness and accuracy with direct app-to-app integration
- Replace periodic batch updates with real-time data synchronizations
- Ensure proper provisioning with email, application access and single sign-on
- Eliminate cumbersome file-based or custom-coded synchronization
- Manage the full employee lifecycle, from initial hire to separation

Why Boomi?

Enterprise Connectivity

- Dramatically cut the time and cost of integration
- Implement integration projects in days or weeks, not months
- Gain real-time insights across the business
- Reorient core processes around the customer
- Improve data quality and consistency
- Flexibly scale and adapt to business needs

Pure Cloud

- No hardware to install or maintain
- Automatic upgrades
- Predictable usage-based pricing
- Single instance, multi-tenant architecture
- Accessible from any browser

Robust Integration

- Proven connectivity to 1,000+ unique endpoints, including 200+ applications
- Drag-and-drop integration development, no coding required
- Any-to-any integration across cloud and on-premise systems
- Intuitive, centralized integration management
- Community access to connectors, widgets and process maps
- Extensive crowd-sourced knowledge and guidance
